THE COVID-19 RESEARCH OUTBREAK

How the Pandemic Culminated in a Surge of New Researchers

S. Venturini · Satyaki Sikdar · M. L. Charpignon · S. Kumar F. Rinaldi · F. Tudisco · S. Fortunato · M. S. Majumder

INTRODUCTION

COVID-19 AND THE SCIENTIFIC COMMUNITY

• COVID-19 drastically changed academic publishing

INTRODUCTION

COVID-19 AND THE SCIENTIFIC COMMUNITY

- COVID-19 drastically changed academic publishing
- Community coalesced around COVID-19 research

CORONAVIRUS RESEARCH

Hundreds of studies about the virus have been published since the outbreak began.

Journal articles Preprints

Callaway, Ewen, et al. "Coronavirus by the numbers." Nature (2020)

INTRODUCTION

COVID-19 AND THE SCIENTIFIC COMMUNITY

- COVID-19 drastically changed academic publishing
- Community coalesced around COVID-19 research
- New researchers involved in outbreaks and infectious diseases discourse

TORRENT OF PREPRINTS

Around one-quarter of the scientific articles that relate to COVID-19 are preprints, by one estimate. Many appeared at medRxiv, a site for medical preprints, which has grown hugely as a result of the pandemic. Some were posted on bioRxiv and other preprint servers.

Callaway, Ewen. "Will the pandemic permanently alter scientific publishing?" Nature (2020)

RESEARCH QUESTIONS

• How was the emergence of academic publishing about COVID-19 *unique*?

Key Questions

- How was the emergence of academic publishing about COVID-19 unique?
- Was the *explosion* in publications due to

- How was the emergence of academic publishing about COVID-19 unique?
- Was the *explosion* in publications due to
 - infectious diseases experts publishing a lot more?

- How was the emergence of academic publishing about COVID-19 unique?
- Was the *explosion* in publications due to
 - infectious diseases experts publishing a lot more?
 - new researchers writing about infectious diseases and pandemics

- How was the emergence of academic publishing about COVID-19 unique?
- Was the *explosion* in publications due to
 - infectious diseases experts publishing a lot more?
 - new researchers writing about infectious diseases and pandemics
- Is such an explosive growth of a field *healthy*?

- How was the emergence of academic publishing about COVID-19 unique?
- Was the *explosion* in publications due to
 - infectious diseases experts publishing a lot more?
 - new researchers writing about infectious diseases and pandemics
- Is such an explosive growth of a field *healthy*?
 - In emergency situations?

- Was the *explosion* in publications due to
 - infectious diseases experts publishing a lot more?
 - new researchers writing about infectious diseases and pandemics
- Is such an explosive growth of a field *healthy*?
 - In emergency situations?
 - In non-emergencies?

COVID-19 PUBLICATIONS IN NUMBERS

Setup

- 1 2
- Training Window (TW): pre-shock 5 years
 - Observation Window (OW): post-shock 2.75 years

COVID-19 PUBLICATIONS IN NUMBERS

SETUP

- Training Window (TW): pre-shock 5 years
- 2 Observation Window (OW): post-shock 2.75 years
- Core topics: COVID-19, SARS-CoV-2, 2019-2020 COVID-19 outbreak

COVID-19 PUBLICATIONS IN NUMBERS

Setup

- Training Window (TW): pre-shock 5 years
- 2 Observation Window (OW): post-shock 2.75 years
- Core topics: COVID-19, SARS-CoV-2, 2019-2020 COVID-19 outbreak
- Outbreak Science topics: Outbreak, Infectious Diseases, Pandemic, Epidemic

– COVID-19 works 🛛 – COVID-19 authors 🚽 Outbreak Sci works 🗛 – Outbreak Sci authors

Surge of Authors in COVID-19 Research

AUTHOR TYPES

Experts Prior publications on Outbreak Science or core topic(s) during TW

SURGE OF AUTHORS IN COVID-19 RESEARCH

AUTHOR TYPES

Experts Prior publications on Outbreak Science or core topic(s) during TW **Bellwethers** Prior publications *not* on Outbreak Sci or core topic(s) during TW

AUTHOR TYPES

Experts Prior publications on Outbreak Science or core topic(s) during TW **Bellwethers** Prior publications *not* on Outbreak Sci or core topic(s) during TW **Newcomers** No prior publications during TW

INFLUX IN CONTEXT

INFLUX IN CONTEXT

INFLUX IN CONTEXT

Key Findings

• Unprecedented volume of new authors to COVID-19 research

Key Findings

- Unprecedented volume of new authors to COVID-19 research
- $\bullet\,$ Experts account for ${\sim}10\%$ of all authors, compared to 30-40% for Deep Learning and >50% for QED

Key Findings

- Unprecedented volume of new authors to COVID-19 research
- $\bullet\,$ Experts account for ${\sim}10\%$ of all authors, compared to 30-40% for Deep Learning and >50% for QED
- Majority of COVID-19 articles were authored by teams of authors *without* prior works in *Outbreak Sciences*

KEY FINDINGS

- Unprecedented volume of new authors to COVID-19 research
- Experts account for ${\sim}10\%$ of all authors, compared to 30-40% for Deep Learning and >50% for QED
- Majority of COVID-19 articles were authored by teams of authors *without* prior works in *Outbreak Sciences*

FUTURE DIRECTIONS

• Linking scientific discourse with real-world events

KEY FINDINGS

- Unprecedented volume of new authors to COVID-19 research
- $\bullet\,$ Experts account for ${\sim}10\%$ of all authors, compared to 30-40% for Deep Learning and >50% for QED
- Majority of COVID-19 articles were authored by teams of authors *without* prior works in *Outbreak Sciences*

FUTURE DIRECTIONS

- Linking scientific discourse with real-world events
- Studying *collaboration habits* of newcomers and bellwethers

KEY FINDINGS
